SUMMARY

I hold a degree in computer science with a focus on informatics engineering and have three years of professional experience as a programmer. During that time, I worked on developing and maintaining software solutions, as well as supporting e-commerce projects involving user experience and visual design. While I have spent the past couple of years in a different field, I have maintained a strong interest in technology and am eager to re-enter the IT sector. I bring a solid technical foundation, strong problem-solving abilities, and a reliable, detail-oriented approach to any team.

WORK EXPERIENCE

Research and Development (SAP), PT Be One Solution Indonesia **Oct 2018 - Feb 2019**

- Developed and programmed dashboards, providing clients with user-friendly access to critical data insights.
- Collaborated with consultants to understand client requirements and customize SAP solutions to improve system functionality.

Programmer Staff, PT Periplus Bookindo Indonesia **Mar 2019 - Sep 2022**

- Developed and maintained web applications for the company's e-commerce platform, ensuring optimal performance, security, and scalability.
- Designed and implemented graphic elements for the website, enhancing the overall user experience and visual appeal.
- Collaborated with cross-functional teams to add new features, troubleshoot technical issues, and improve site functionality.

Krantenbezorger, DPG Netherlands **Jan 2023 - Jun 2025**

- Delivered newspapers to over 250 households daily, consistently meeting deadlines and ensuring accurate delivery. Organized and sorted deliveries efficiently, optimizing routes to save time and improve productivity. Maintained positive customer relationships by addressing inquiries and resolving delivery issues quickly.

Magazijnmedewerker, Brocacef BV **Feb 2025 - Oct 2025**

- Operated warehouse systems for scanning, order tracking, and inventory control.
- Followed GDP (Good Distribution Practice) guidelines to ensure proper handling of medical products.
- Collaborated with team leaders and colleagues to meet daily productivity and quality targets.
